9/29/05

1. (Previously Presented) A reduced image forming apparatus comprising:
recording means for recording a plurality of images;
dividing means for dividing each of the plurality of images into a plurality
of image blocks;
extracting means for extracting a plurality of partial images from each of the
plurality of image blocks, the partial images being of a size in accordance with a reduction
ratio from each respective block;
generating means for combining the plurality of partial images extracted by
said extracting means and generating a plurality of combined images, which correspond to
respective ones of the plurality of images, smaller than the original image; and
indicating means for indicating the plurality of combined images generated
by said generating means.
2. (Canceled).
3. (Previously Presented) An apparatus according to claim 1, wherein said
dividing means divides said original image into a plurality of uniform image blocks.
4. (Previously Presented) An apparatus according to claim 1, wherein said
extracting means obtains the partial image at a same position in each image block.
